Valid till December 31, 2005

## *Alternator Model 6250 and 3500 OEM Price List*

This information is for those who are interested in purchasing just the Model 6250 (new and improved model 6200) and 3500 alternators without the engine.

Polar's alternators are built to fit on engines with standard SAE specifications. Our current engine manufactures include Kawasaki, Kohler, Lister Petter, Yanmar, and Lombardini.

Even with standard SAE specifications there is no such thing as a universal fit. Each engine model series has sufficient deviations as to require that we provide a specific mating part.

Polar's present models are bearing less and use no flexible couplings to mount on to the engine. This design is simpler and more reliable; but it requires that our alternator be engineered for that specific engine model.

The cost to modify or determine the adaptability of our alternators for engines not listed on our web site will exceed any cost saving you might experience by providing your own engine. Purchasing just the alternators makes sense only if your are working on an experimental engine or you plan to enter production of your own generator set.

| <b>Quantity</b> | <b>Model 6250</b> | <b>Model 3500</b> |
|-----------------|-------------------|-------------------|
| 1               | \$3,700           | \$2,600           |
| 2 – 9           | \$3,200           | \$2,100           |
| 10 – 49         | \$3,000           | \$1,400           |
| 50 – 99         | \$2,600           | \$1,200           |
| 100 – 200       | \$2,200           | \$ 950            |

For larger quantities please consult factory.

Pricing is FOB Polar Power, Carson, California.

Delivery is 8 to 16 weeks.

Pricing Valid to Jan 15, 2000

No further dealer/distributor discounts available off listed prices.
